***Claim Rejections - 35 USC § 102***

The 102 rejections set forth in the previous office action dated 11/15/04 are maintained. Claims 27-28 and 31-47 are rejected for the same reasons of record.

***Response to Arguments***

Applicant's arguments filed 5/19/05 have been fully considered but they are not persuasive.

Applicant's argue the instant compound is not the same as the prior art because it is purer. "Purity" alone does not lend itself to patentable distinction of an otherwise known compound. The alleged "new" compound must give some substantial new use or property not otherwise possessed by the same prior art compound that meets the requirement for patentability.

Applicant is trying to patent the same compound just because it is produced by a different process. A new process for making an old compound does not make that compound automatically patentable. Product by process claims are only applicable in this case where the product is wholly different and cannot be described any other way other than by the process. A product by process claim does not fit in this case because the compound can be defined by it's structure which is known and definite.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1626

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
